

USER MANUAL

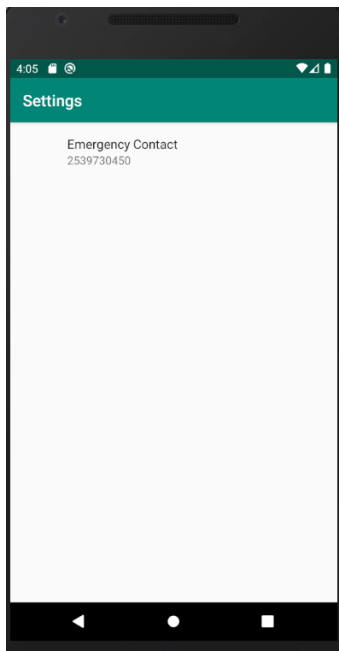

The app is intuitive and requires little to no learning curve. Users familiar with basic user interfaces and Google Maps will find the app instinctive. Please note that TalkBack is not available in Android emulators.

Four large buttons on each corner of the screen constitute the main menu. This menu is shown below:

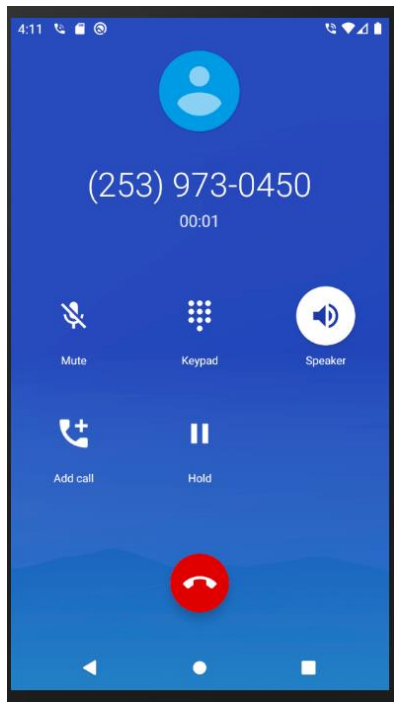

Main menu.

The user may select SETTINGS, where he can input an emergency number as shown below:

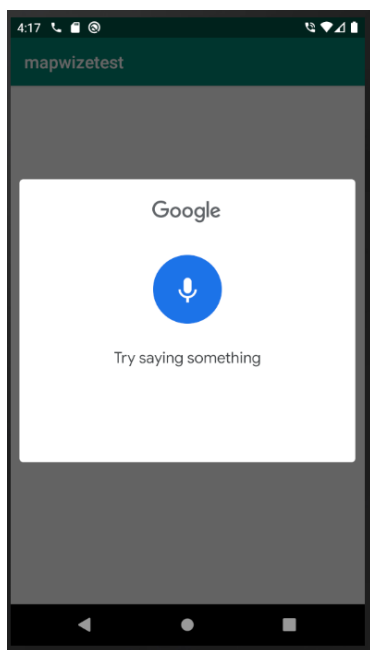

The user can set and edit the emergency contact number.

The user can select CALL EMERGENCY NUMBER, where the phone will call the phone number set in SETTINGS.

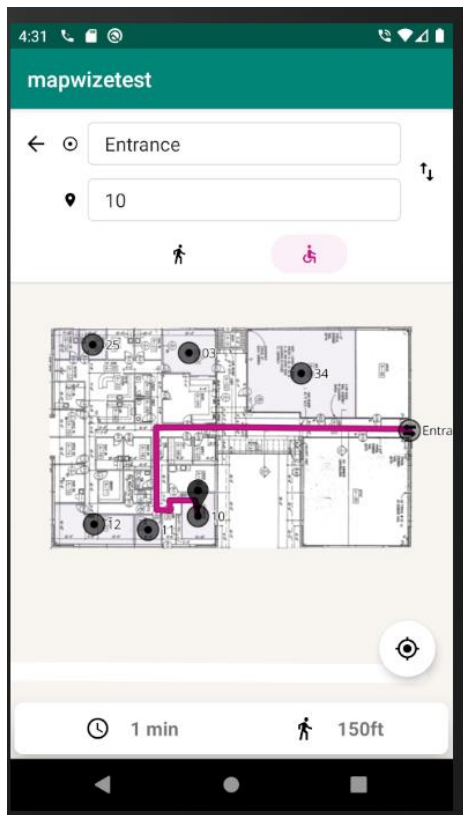

After selecting CALL EMERGENCY NUMBER.

When the user selects INPUT ROOM, the app will ask the user permission to record audio. Upon pressing Allow, the app will listen for the user to speak aloud the desired room number. After it hears a room input, it will return to the main menu.

The user voicing his room choice.

With the desired room saved, the user can select NAVIGATE to bring up the map view.

The user can follow the route from the entrance to the desired room number.
